Project Specification

Instantiate your idea and show it to the clients (Professor)
General specification

- Basic Functionalities
  - Who are the clients
  - What actions they are expected to perform
  - Think more about interactions between clients and server
Instantiate your proposal (1)

- What does the page look like?
  - Forms, buttons, links ..... 
  - What are users’ actions

Welcome to the application webpage

Address

Street

City | State

Zip Code | Continue
Instantiate your proposal (2)

Control flow

- Relationship between pages and buttons
Start from simple cases

- Simple page and control flow

Later consider validation and exception
With validations
In summary

- Think of the pages
  - Forms, links, buttons ...
  - On the page: data, actions ......
- Control flow
